WHAT TO EXPECT

Special machines from batch size 1

You assemble steel assemblies and special machines to drawing — individual parts and small batches from batch 1, every workpiece different instead of an assembly-line cycle.

Straighten, fit, bring to size

You straighten, tack, drill and precisely fit assemblies made of structural steel, Hardox and stainless steel 1.4301, and secure dimensional accuracy with measuring equipment.

Heavy construction up to 50 t

You assemble at the interface to the EXC3 welding shop and CNC large-part machining — on special-machine assemblies up to 50 t, all trades under one roof.
